Tecnoambiente receives the third Asepeyo Prize on the “best practice for risk control” category

- *Tecnoambiente has received third prize for “best practice for risk control” awarded by Asepeyo for the project that it has been implementing in Guinea-Conakry since May 2015.*

Barcelona January 28, 2016. Tecnoambiente has received third prize for “best practice for risk control” awarded by Asepeyo for the project that it has been implementing in Guinea-Conakry since May 2015.

The consultancy project that Tecnoambiente is implementing for Atlantic Mining in Guinea-Conakry coincided with the Ebola outbreak in the country. This meant that extraordinary measures had to be taken in workplace risk prevention (with the drafting and monitoring of protocol for action, before, during and after the campaigns, an integrated emergency plan and some adjustments to the crisis committee protocol) so that the project could go ahead as expected.

The good prevention work carried out by the Tecnoambiente team led by Arsinoe Siguero, SHEQ Technician, encouraged the submission of the project for the IV edition of the Asepeyo Prizes for best preventive practices.

Preventive action has been and remains Asepeyo’s primary objective, because it understands that the best way of dealing with workplace accidents and work-related illness is prevention: acting before the accident or work-related illness happens.

The Asepeyo Prizes for best preventive practices are aimed at recognising and rewarding companies associated with Asepeyo which are outstanding because of their activities regarding work-related risk prevention.

Tradebe

Tradebe is a leading companies in the industrial waste management in Europe (Spain and the UK) and the United States, with subsidiaries in France. Tradebe are about 2,000 people worldwide, located over more than 60 treatment plants.
