

Tradebe UK

Tradebe is a multinational business that specialises in environmental services. We provide flexible, innovative and technologically driven solutions for the processing and recovery of hazardous and non hazardous waste.

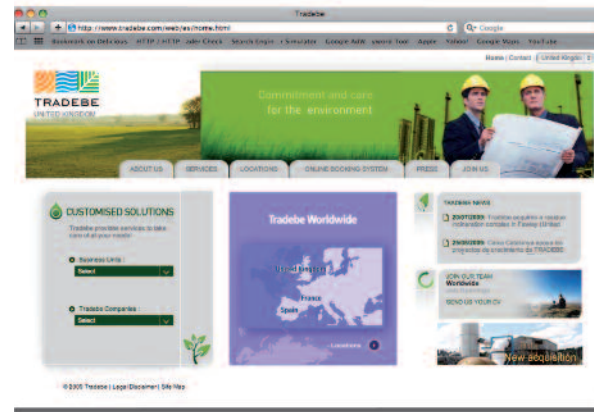

Working through a national network of service and disposal facilities, Tradebe offers a bespoke, 'one-stop-shop' solution to waste management. Our objective is to provide sustainable cost effective solutions in line with the UK Waste Strategy and regulatory framework.

Tradebe is one of the largest treatment companies in the UK and is expanding its business both through organic and acquisitive means. We offer a full, safe and secure waste management service.

Tradebe is able to offer total waste management services through its TWM division. In addition to that, Tradebe provides on-site services in conjunction with our sister company Willacy Oil Services.

Online booking system

Tradebe in conjunction with our business partner WasteCare, offers an online total recycling and recovery solution to companies located throughout the UK and Ireland. As specialists in providing total waste management solutions, we offer nationwide collection of both non-hazardous and hazardous waste.
